

# Monthly Safety Training

## ALWAYS USE.

Always use a 5th wheel pin puller to pull the 5th wheel handle. This is a simple way to hook and release a latch without having to reach under the trailer.

## HOW TO USE.

To use a pin puller, make sure your feet are planted firmly on the ground. Avoid twisting, quick, or jerky motions. Always use two hands instead of one.

## IF YOU DON'T USE.

Not using the pin puller can cause neck, shoulder, and back injury. Extending your arm straight out under the trailer can feel like you are holding a 50 pound sack potatoes.

## IF YOU HAVE TROUBLE USING.

If you encounter resistance from the 5th wheel, rock the vehicle back against it to release tension. You can also get back in the cab and nudge the trailer to release pressure.

## EASY AND LESS MESSY TO USE.

Using a pin puller is easy and less messy than doing it yourself. Grease, oil, and grime can mess up your clothes and make for a bad work day.

## TAKE THE QUIZ!

We have created short, fun games for each monthly safety training topic. Scan or click the code to play along!
