Monthly Safety Training

SIMPLE AND EFFECTIVE.

Seatbelts may be simple devices, but these straps can be the difference between life and death. Being unbuckled during an accident increases the likelihood of a fatality 30 times.

EJECTION IS NOT AN OPTION.

75% of unbuckled occupants in fatal crashes are ejected from their vehicles and are rarely “thrown clear” from the vehicle when an ejection occurs. In fact, ejections almost always result in severe injuries or fatality.

STAY WHERE YOU BELONG.

Seatbelts keep the driver where they belong: securely behind the wheel.

STAY IN CONTROL.

Seatbelts prevent the driver from being tossed around the cab in the event of a rollover or crash, allowing for more chance to regain control of the vehicle. 52% of truck occupant fatalities involve a rollover.

SAFETY ALWAYS WINS.

Buckle up and drive smart. A truck driver is 80% less likely to die when wearing a seatbelt.
